  - The Delimitation Commission for the partition of Bengal and Punjab was chaired by Cyril Radcliffe.
  - Cyril Radcliffe was a British lawyer who had never been to India before being appointed to chair the Delimitation Commission.
  - He was given the task of drawing the borders between the newly independent nations of India and Pakistan in 1947.
  - The Radcliffe Line, named after him, was announced on August 17, 1947, and is the demarcation line between India and Pakistan.

The **McMahon Line** is a boundary line in the eastern Himalayas. It:

- Forms the border between **Arunachal Pradesh** (India) and the **Tibet Autonomous Region** (China).
- Was drawn in 1914 during the **Simla Convention**.
- Is about **890 km (550 miles)** long.
- Follows the **Himalayan watershed (mountain ridge line)** rather than a straight line on flat land.

- **Perihelion**
  - It is the point of the Earth's orbit that is nearest to the Sun.
  - It happens near of 4th of January.
  - The earth reaches perihelion only once a year
- **Equinox**
  - It refers to a day with an equal duration of day and night.
  - There are two equinoxes in a year:

    1. March 20(Vernal Equinox)
    2. September 22(Autumnal Equinox)

Solstice

- **Solstice**
  - It is the time of the year when the sun is farthest from the equatorial giving the long days or nights.
  - It happens twice a year
    1. Summer Solstice (June 21)
    2. Winter Solstice(December 22)

सूर्य समीपक

- यह पृथ्वी की कक्षा का वह बिंदु है जो सूर्य के सबसे नजदीक है।
- यह 4 जनवरी के पास होता है।
- पृथ्वी वर्ष में केवल एक बार पेरीहेलियन तक पहुँचती है

विषुव

- यह दिन और रात की समान अवधि वाले दिन को संदर्भित करता है।
- एक वर्ष में दो विषुव होते हैं:
  1. 20 मार्च (वर्नल इक्विनॉक्स)
  2. 22 सितंबर (शरद विषुव)

अयनांत

- यह वर्ष का समय है जब सूरज भूमध्य रेखा से सबसे लंबे दिन या रात दे रहा है।
- यह साल में दो बार होता है
  1. ग्रीष्मकालीन संक्रांति (21 जून)
  2. शीतकालीन संक्रांति (22 दिसंबर)

Additional Information

- **Mercury**: It has a rotation period of **58.6 Earth days**, which is **longer** than its orbit around the sun.
- **Jupiter:** It has a rotation period of **9.9 Earth hours,** making it the **fastest rotating planet** in our solar system.
- **Mars:** It has a rotation period of **24.6 Earth hours,** which is similar to Earth's rotation period.
- **Venus:** It has a rotation period of **243 Earth days**, making it the **slowest rotating planet** in our solar system.

Comets:-

- These are **cosmic snowballs** of **frozen gases, rock, and dust** that orbit the Sun.
- They have a **coma**, a fuzzy atmosphere of gas and dust that surrounds the nucleus, and a **tail** that points away from the Sun.
- Comets are believed to be remnants from the **formation of the Solar System.**
- They can have **highly elliptical orbits** and can take hundreds or thousands of years to complete one orbit around the Sun.

Meteors:-

- These are small rocks or debris that **burn up** upon entering Earth's atmosphere, while **meteorites** are any **surviving pieces** that reach the ground.

Stars:-

- These are massive, luminous spheres of **plasma** held together by **gravity.**

- **Neptune** is the eighth planet from the Sun and is known to have a **well-defined Kuiper Belt region** that extends from about **30 AU to 50 AU** from the Sun.

Pluto has a natural satellite named 'Charon'.

Haumea is a dwarf planet located beyond Neptune's orbit.

Neptune

- **It has the strongest winds in the Solar System.**

Additional Information

Koppen divided India into nine climatic regions

- **Amw** - Monsoon type with the short dry winter season.
- **As** - Monsoon type with the dry season in high sun period
- **Aw** - Tropical Savanah type
- **BShw** - Semi-arid steppe type
- **BWhw** - Hot desert type
- **Cwg** - Monsoon type with dry winters
- **Dfc** - Cold, Humid winters type with shorter summer
- **Et** - Tundra type
- **E** - Polar type

Tahiti

- Tahiti experiences a fairly dry winter, with average rainfall ranging from **20 to 40** millimeters (0.79 to 1.57 inches) per month.

Kaal Baisakhi

- **In West Bengal, the localised thunderstorms associated with violent gust and heavy rain is known as 'Kaal Baisakhi'.**
- **Kaal Baisakhi**
  - It is a local rainfall and thunderstorm occur in Assam and West Bengal and in India or Bangladesh.
    - It occurs in the **summer** season.
  - It harms life and money and generally occurs in the month of **Baisakh** (April-May), hence it is known as 'Kaal Baisakhi'.
  - It originated from **Chota Nagpur Plateau.**
  - Since It is caused by winds coming from the **north-west direction**, they are also called **'norwesters'.**

Loo

- The loo is a **local wind**.
- It is a dusty, hot, and **dry summer wind**.
- It is a **harmful** local wind.
- It blows in the plains of **northern India** and **Pakistan.**
- It blows from the west in the months of **May and June**.
- It may cause sunstroke.

ıs the solution helpful? Yes No

- **Formation of the British trading centers**
  - Surat (1613)
  - Madras (1639)
  - Bombay (1668)
  - Calcutta (1686)

dentify the local name given to the total amount of winter precipitation.

  - Allowed limited participation of Indians in legislative processes through indirect elections.
  - Marked the beginning of Indian representation in governance.

The **Doctrine of Lapse** was introduced in **1848**.

📜 Order of Annexation

1. **Satara** – 1848
2. **Jaitpur** – 1849
3. **Sambalpur** – 1849
4. **Baghat** – 1850
5. **Udaipur (Central India)** – 1852
6. **Nagpur** – 1853
7. **Jhansi** – 1854

- The Tropic of Cancer passes through 8 states namely Rajasthan, Gujarat, Madhya Pradesh, Chhattisgarh, Jharkhand, West Bengal, Tripura, and Mizoram.

Cities through which the Tropic of Cancer passes:

State	City
Gujarat	Jasdan
Rajasthan	Kalinjarh
Madhya Pradesh	Shajapur
Chhattisgarh	Sonhat
Jharkhand	Lohardaga
West Bengal	Krishnanagar
Tripura	Udaipur
Mizoram	Champhai

Purvachal hills

- The range is an eastern extension of the Himalayan Range System, in **northeastern India.**
- It bends sharply to the south beyond the **Dihang River gorge** and spreads along the eastern boundary of **India with Myanmar.**
- **The Purvanchal includes** the hill of the **Patkai, Barail Range, Naga Hills, Lushai Hills, and Jampui Hills.**
- The **highest peak of the Purvanchal Range** is **Mount Dapha.**
- **Patli hills is not part of Purvanchal hills**.

- Patli Hills is a range of hills located in the south of Delhi, India.

It has a cold desert climate (Köppen climate classification BWk) with long, cold winters from late November to early March

?????????

Lakshadweep is the smallest union territory of India.
It consists of **36 islands with an area of 32 sq km**.
It's made up of 12 atolls, 3 reefs, and 5 submerged banks out of which **10 Islands are inhabited.**
Lakshadweep was formerly known as Laccadive Islands.
The name Lakshadweep in Malayalam and Sanskrit means 'a hundred thousand islands'.
Kavaratti is the capital of Lakshadweep.
Minicoy is the second-largest and southernmost island and **Androtl Island is the largest of the group.**
Minicoy is separated from the rest of the Lakshadweep by a Nine-degree channel.
The eight-degree channel separates the Lakshadweep group from the Maldives.

- **The Mahadeo Hills are a range of hills in Madhya Pradesh state of central India.**
- These are located in the northern part of the Satpura Range.
- Highest peak is Dhoopgarh.
- Satpura Mountain Range is southward of Vindhya Hills and parallel to it.
- **Mahadeo Hills** are located in **Gujarat**.
- **Satpura** range is a range of hills in Central India.
- The range rises in eastern Gujarat, through the border of **Maharashtra** and **Madya Pradesh** to the east of **Chhattisgarh.**

Blossom Showers

- **It is related to Kerala.** ***Hence, Pair 3 is correctly matched.***
- It is referred to as **early monsoon**.
- It helps in the flowering of plantation crops like **Coffee**.
- It occurs mainly during the March-May months, i.e., before the arrival of monsoon into India. Therefore, they are also called the **April Rains.**

The Elephanta Wind

- **It is a strong southerly or southeasterly wind which blows on the Malabar coast of India.** ***Hence, Pair 1 is correctly matched.***
- It blows during the months of **September and October.**
- It marks the **onset of the southwest monsoon**.
- It brings thundersqualls and **heavy rain.**

Arid soils are characteristically developed in _____, which exhibit characteristic arid topography.

Southern Uttar Pradesh

Western Uttar Pradesh

✓ Western Rajasthan

✕ Southern Rajasthan

List-I (Soil Types)	List-II (Climatic Region)
A) Aridisols	i) Arid and semi-arid
B) Inceptisols	ii) Semi-arid and humid
